## Product Guide

### AV-TEKK NEW AND NEW HD

Available in many High Volume applications

- High efficiency and durable Cooler Designs
- Heavy Duty Bar & Plate options along with OE Style Tube & Fin designs
- Industry Leading Charge-Air Coolers.
- Seven-Year Warranty - Unlimited Miles (Bar & Plate)  
Two-Year Warranty (Tube & Fin)

### HOSE & CLAMP KITS

- Order corresponding kit part number to get everything you need to replace ALL hosing for the charge-air cooler.
- Both hoses contained in Kits are hot side compatible.

### QUICK CHECK LEAK TEST KITS

- No other special tools needed
- Quickest and easiest connections available
- Simulates a constant air load for accurate diagnostics
- Fits most charge air cooler connection types
- Relief valve and restraints for safety
- Includes compact carrying case

## GET TO KNOW YOUR CHARGE-AIR COOLER

Today, charge-air coolers are used on virtually every heavy-duty truck. They are essential to meet engine manufacturers' design objectives for horsepower, fuel economy, and exhaust emissions.

The trend toward smaller sized engines producing higher horsepower places increased stress on critical performance components such as turbochargers and charge-air coolers. Boost pressures have driven cooler inlet temperatures from around 325°F during the 70's and 80's, to over 400°F in later model engines.

A typical cooler operating with slightly over 400°F inlet temperature will drop the boosted air's temperature to just over 100°F before it enters the engine. This drop of nearly 300°F causes extreme thermal stresses from expansion and contraction of the entire structure. These stresses along with engine load variances and chassis vibrations cause frequent fatigue failures, the majority being cracked header plates and air tubes (see image below).

### Understanding Your Service Options:

#### “FIX AND GO”

Putty type fix at a radiator repair shop is not durable and often leads to wasted time and money. It does not strengthen weak areas that will eventually fail when placed back in service.

#### LOW COST/LOW QUALITY

NOT COMMERCIALLY  
ACCEPTABLE!

#### “REPLACE & REWELD”

Complete replacement of the center section or “brick” is good but very expensive and is subject to the quality of the replacement brick

#### HIGH COST/HIGH QUALITY

OK SOLUTION!

#### “Av-Tekk NEW & NEW HD”

Av-Tekk's New and New HD units require no core and both offer superior quality and performance. These completely new replacement coolers are available in several high volume applications.

#### LOW COST/HIGH QUALITY

BEST SOLUTION!

## SAVING MONEY WITH AV-TEKK

The Av-Tekk brand means Av-Tekk solutions. Our brand has been revolutionizing the charge-air cooler industry since the very beginning. We have made it our mission to improve the durability and experience of all diesel charge-air coolers. From the introduction of the only FAA approved rebuild process for charge-air coolers, to our amazing heavy duty bar and plate designs, Av-Tekk is constantly working to improve our brand through the quality of products we provide. Even now when the industry is asking more of its diesel charge-air coolers, Av-Tekk's products stand above the rest.

AV-TEKK NEW HD

TYPICAL TUBE & FIN

Our “Heavy-Duty” bar and plate construction, denoted by “HD” on the part number suffix, is the most rugged and durable type of construction and is backed by our 7-year/unlimited mileage warranty. The “HD” coolers are available on most popular applications where experience has shown they are needed.

- Industry's Best Charge-Air Coolers
- Nation Leading Warranty
- Broadest Service Network
- Priced Right for Highest Value

Example of Tube & Fin construction using a header plate, typical of most OEM designs.

Example of Av-Tekk's Heavy Duty Bar & Plate Construction Design

Av-Tekk's HD design uses a series of heavy bars and plates to form a stronger cooler and eliminate the header plate and the fragile air tubes permitting the manifolds to be welded directly to the bars in the construction process.

*Industry studies have shown header plate thermal fatigue failures and air tube leaks account for the majority of charge-air cooler failures.*

Are you testing coolers to see if they are leaking beyond O.E.M. specifications?

## QUICK CHECK ADVANTAGES

- No other special tools needed
- Quickest and easiest connections available
- Simulates a constant air load for accurate diagnostics
- Fits most charge air cooler connection types
- Relief valve and restraints for safety
- Includes compact carrying case

THIS COMPLETE KIT COMES WITH ALL ADAPTERS AND FITTINGS TO TEST ALL TRUCK SIZES, PICKUPS THRU CLASS 8 TRACTORS.

ORDER PART NUMBER A351CAS

## FOR MORE ON QUICK CHECK LEAK TEST KIT GO ONLINE TO: [WWW.AV-TEKK.COM](http://WWW.AV-TEKK.COM)

Av-Tekk's new Test Kit may be used to test the pressure drop of most known sizes of charge-air coolers (CAC).

According to most O.E. Manufacturer's Specifications, charge-air coolers that show a static pressure drop greater than 5 PSI in a 15 second test, beginning at 30 PSI, should be replaced. Av-Tekk's new CAC Test Kit provides tools for you to safely determine whether any CAC passes or fails the manufacturer's test.

### IMPORTANT!

### USING HIGH AIR PRESSURES AND LARGE TEST PLUGS MAY PRODUCE DANGEROUS RESULTS!

*Please read the warnings supplied with the test kit before following these instructions.*

The test plugs in this set are heavier duty than most. Notice that each has a thicker washer to prevent cupping when you tighten the test plugs in the opening. They also have 4" long cast handles that permit you to tighten them more easily.

Inspect the inside of the opening and the test plug rubber, to make sure both of these surfaces are clean and dry. Test plugs should be installed flush with the opening and tightened firmly by hand. Install the Test Plug Clamp, positioning it over the handle so the notched portion of the

clamp engages the outside of the inlet/outlet just behind the bead. Hand tighten the long wing bolts equally, and check again to make sure that the notched portion of the clamp is engaged behind the bead at four points. Hand tighten the wing bolts until snug or use an open-end wrench to tighten. Do not over tighten!

*If the cooler has been removed from the vehicle, position it so the open stem is pointing up. Next, connect the brass tester at the quick disconnect side. This tester is equipped with a pop-off safety valve that has been preset to 35 lbs maximum pressure. DO NOT CHANGE THIS SETTING OR TAMPER WITH THIS DEVICE IN ANY MANNER.*

Keep this safety valve clean and dry. Check it occasionally to make sure that it releases pressure at the 35 lbs setting. Replacement safety valves and other parts are available if ever needed.

After checking to make sure everything is properly secured, introduce air through the air stem using a common tire chuck. Increase the air pressure to precisely 30 PSI and then measure the pressure drop, if any, for a period of 15 seconds.

As soon as you have finished testing the charge-air cooler, return all parts of this set to the plastic case provided, and close it to keep them clean and dry for their next use.

These complete kits have both hoses and clamps to replace ALL hosing from charge-air cooler inlet and outlet.

Both hoses contained in the Av-Tekk Hose and Clamp Kits are hot side compatible.

**Now order one part number to get everything you need to  
replace ALL hosing for the charge-air cooler.**

#### Av-Tekk Hose & Clamp Kits

# **Av-Tekk®**

## **WARRANTIES**

### **SPECIFIC COVERAGE**

#### **Two-Year Warranty:**

*Av-Tekk Brand New Charge Air Coolers bearing the proper identification are warranted against defects in materials and workmanship for a period of two years regardless of vehicle.*

*Any Av-Tekk Brand Charge Air Coolers, New that fails to deliver satisfactory service due to air leakage within the cooler will be reconditioned or replaced at no charge for a period of two years from the date purchased regardless of vehicle mileage. In order to Qualify "Leak Free," the Definition shall be: "when tested at 20 PSI an Av-Tekk Brand Rebuilt or New Charge-Air Cooler will not lose more than 1 PSI in 15 seconds."*

#### **Seven-Year Warranty:**

*Av-Tekk Brand New HD Charge Air Coolers bearing the proper identification are warranted against defects in materials and workmanship for a period of seven years regardless of vehicle mileage.*

*Any Av-Tekk Brand Charge Air Cooler; New HD, that fails to deliver satisfactory service due to air leakage within the cooler will be reconditioned or replaced at no charge for a period of seven years from the date purchased regardless of vehicle mileage. In order to Qualify "Leak Free," the Definition shall be: "when tested at 20 PSI an Av-Tekk Brand New HD Charge-Air Cooler will not lose more than 1 PSI in 15 seconds."*

#### **Exclusions:**

*This warranty does not cover Charge Air-Coolers which fail to meet the above condition due to the following causes:*

1. Off Highway applications, such as Logging and Mining operations.  
Standard Two Year warranty applies.
2. Vehicle damage
3. Incorrect or improper mounting
4. Damage caused by abuse, neglect, collision, fire, vandalism, or chemical corrosion

*This warranty does not provide compensation for downtime, service, labor charges, or taxes.*

*Av-Tekk will pay 1.5 hours of labor for warranty replacement. This warranty applies only to the original purchaser and is not transferable.*

**CLAIMS NOT PROPERLY FILLED OUT WILL NOT BE RETURNED**

**INSTRUCTIONS:**

- All claims must be typed or neatly hand written (please print legibly)
- Call your supplying Av-Tekk warehouse for a Return Goods Authorization (RGA) Number

*Performance Turbochargers*  
8482 Cherry Avenue  
Fontana, CA. 92335  
Phone: 909-429-7200  
Fax: 909-429-7204

*Diesel Injection Service Co., Inc.*  
4724 Allmond Avenue  
Louisville, KY 40209  
Phone: 800-651-7800  
Fax: 800-933-3432

- Return all failed units to your supplying Av-Tekk warehouse

The following documentation must be included with claim:

1. Work Order or Repair Order
2. A copy of the dated invoice when Av-Tekk product was bought

- Completed forms must be return faxed or emailed to supplying Av-Tekk Warehouse
- Identification tag showing part number and serial number must be on charge-air coolers
- Return Goods Authorization (RGA) number must be referenced on outside of box being returned
- Return unit freight prepaid: Freight will be credited on all approved warranty claims

# HEAVY DUTY COOLERS FOR LONG LIFE

The trend toward smaller sized engines producing higher horsepower places increased stresses on critical performance components such as turbochargers and charge-air coolers. Boost pressures have driven cooler inlet temperatures from around 325°F during the 70's and 80's, to over 400°F in later model engines.

A typical cooler operating with slightly over 400°F inlet temperature will drop the boosted air's temperature to just over 100°F before it enters the engine. This drop of nearly 300°F causes extreme thermal stresses from expansion and contraction of the entire structure. These stresses, along with engine load variances and chassis vibrations, cause frequent fatigue failures on OEM type tube & fin constructed coolers.

Av-Tekk's solution is a proven design and construction that is impervious to thermal fatigue. *They just don't fail!*

## NO MORE CRACKED HEADER PLATES

ONLY WITH AV-TEKK HD

## NO MORE CRACKS IN AIR TUBES

ONLY WITH AV-TEKK HD

## SEVEN YEARS : UNLIMITED MILES\*

- 100% Brand New Construction
- High efficiency and durable Bar & Plate Design
- Bar & Plate design increases the life of your charge-air cooler when compared to Tube & Fin designs
- Eliminates the majority of charge-air cooler failures, which occur in the Header Plate and Air Tube.

\*WARRANTY TERM ON "HEAVY DUTY" TYPE COOLERS

**ARE YOU TESTING COOLERS  
TO SEE IF THEY ARE  
LEAKING BEYOND  
O.E.M. SPECIFICATIONS?**

***Industry Fact:*** In a survey of over 200 OEM dealerships, service managers throughout the US and Canada came to the consensus that over 50% of trucks over 5 years old have coolers with leakage that exceeds O.E. specifications. That means wasted fuel and engine performance!

There is no better time than now to test charge-air coolers as many fleets have increased their trade cycles. Av-Tekk's Quick Check Leak Test Kit makes testing a charge-air cooler easier than ever and you don't even have to remove it from the vehicle. What are some other Quick Check advantages? Log on to [www.AvTekk.com](http://www.AvTekk.com) for more details about this and other products that bear the Av-Tekk brand.

ONE KIT TESTS ALL SIZES OF COOLERS.
